

Bike MS Champion Living with MS

Geoff Moore

1. **When were you diagnosed with MS?** December 2010
2. **How were you diagnosed with MS?** Following a car accident, I had a CT scan that discovered a white mass on my brain. I had tingly fingers and legs. Because of the white mass my doctor ordered a MRI. I took the MRI to a neurologist. After a few more tests, I was diagnosed with relapsing-remitting Multiple Sclerosis.
3. **How does MS affect your daily life?** I constantly have numb/tingly fingers on my left hand. My right hand feels like it's starting to go the same rout. Some times I will drop money or something light, and not even realize it. It is hard for me to tie a knot, or button up my shirt. Also, I cannot type with all of my fingers.
4. **Why is Bike MS important to you?** Because of past efforts, I have hope that MS will not make me disabled. If we continue to raise money, we may be able to give someone else that same hope.
5. **What's your message to cyclists?** Thank you!
6. **What's the single thing you can't live without?** Family
7. **What are your hobbies/pastimes:** Archery
8. **Identifier- what a cyclists will display when they ride for Geoff:**
